

Stop the governor's proposal for furloughs.

If the governor's proposal for furloughs passes the legislature it will mean a 20% reduction in your pay until a final state budget is passed. This loss of money in the state's economy could cause the loss of more than 14,000 jobs especially in areas of the state which have already been hard hit by the recession and where the state employees make up a large part of the local economy.
